DISCLAIMER. The power rating of the engine indicated in this document is the net power output tested on a production engine for the engine model and measured in accordance with SAE J1349 at the specified rpm. Mass production engines may vary from this value. Actual power output for the engine installed in the final machine will vary depending on numerous factors, including the operating speed of the engine in application, environmental conditions, maintenance and other variables.

<sup>^</sup> Must only be fitted by an approved Honda Auto Start Kit Installer. <sup>^^</sup>Fitting cost/labour extra charge.
